                                                                                                                                                                                                                                                                                                           The invention relates to the isolation of novel rice blast fungus (Pyricularia grisea; also known as Magnaporthe grisea) resistance genes (Incom rice strain BL-1. The genes are designated Pi-b (AAA11349) and Pi-b' (AAA11351). The genes can be used for creating rice which has high blast fungus resistance. This sequence represents the protein encoded by the Pi gene
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              357
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       102
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               417
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             162
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          217

                                                                                                                                     The invention comprises the amino acid and coding sequences of nucleotide binding site (NBS) proteins from the Oryza minuta P19 locus (bacterial blight and rice blast resistance genes). The DNA sequences may be used as markers for resistance to infection with Magnaporthe grisea in plant breeding programs. The present amino acid sequence represents an NBS protein encoded by a gene from the Oryza minuta P19 locus.

```
The present sequence is that of the predicted full-length protein encoded by the novel sorghum resistance gene homologue (RGH) S6-1. The invention provides 13 novel maize, sorghum and rice RGH gene families (see AAZS8273-95) and their protein products (see AAYS8842-54). The novel RGH sequences can be used for the production of transgenic plants (and their cells, tissues and seeds) having improved resistance to disease. Expression of a novel RGH gene confers disease resistance to a plant pinteracting with the complementing phytopathogen avirulence gene product the invention find use in controlling plant pathogen. The methods of pathogens, viruses, nematodes and insects

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
